

emco MSS

Multi Sample Slitter

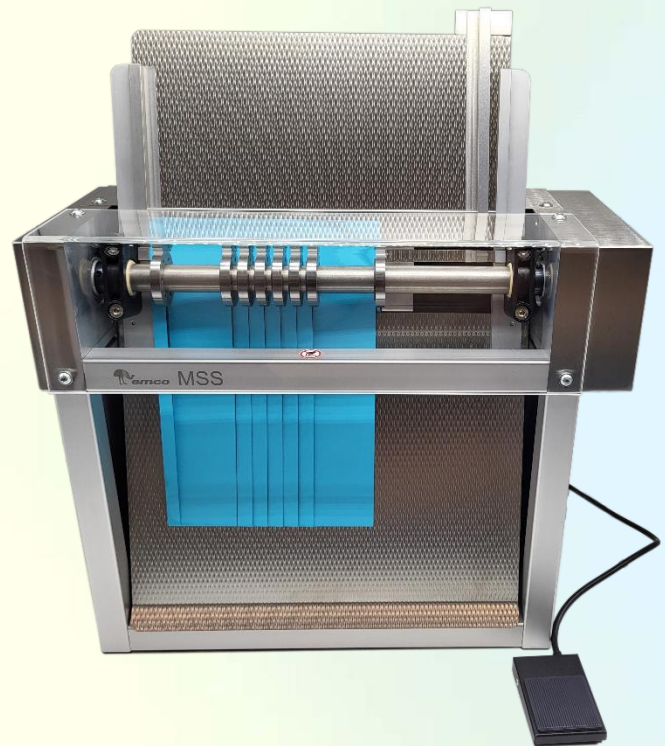

**For fast production of test strips
for standard-compliant paper testing**

- Precision cut of exact paper strips from one paper sheet on both sides within 4 seconds
- Strip width from 10 mm and number of strips are factory-set according to customer requirements
- Standard settings for **emco** devices.

e.g. **7 strips within 4 seconds**

4 x 15 mm / 2 x 50 mm / 1 x 25.4 mm

- Strip length up to 500 mm
- Special steel knives, self-sharpening
- Basic weight: 40 to 300 g/m²
- Operated by foot switch
- Net weight: 20 kg
- Dimensions:
510 x 220 x 610 mm³

The device is designed as a single sheet cutter. The sample sheet is placed on the metal plate and aligned vertically by means of the knives. When the foot switch is actuated, the sample sheet is grasped, drawn in and the strips are cut. The circular knives and the paper feeder are equipped with a touch protection made of transparent plastic.
