

emco RH 2

Moisture meter for determining the humidity of paper cores

- Determination of relative humidity, temperature, and dew point
- Special adaptor for the measurement at the paper core for measurement inside and outside radius
- Easy and non-destructive method
- Automatic recording of climatic conditions

Technical data

measuring range / resolution / accuracy

Moisture and Temperature sensor:

rel. humidity:	0 to 100 % rH	/ 0.1 %	
calibration:	10 to 90 % rH		/ ±1.5 % rH (at 25 °C)
temperature °C:	-20 to +85 °C	/ 0.1 °C	/ ±0.3 °C (at 25 °C)

Displayable measured values: relative humidity, absolute humidity, temperature, dew point, EMC Wood, EMC POM, aW value (water activity)

Operating temperature: -10 °C to 60 °C

Temperature compensation: automatically

Data storage: approx. 10,000 measuring values

Menu language: EN, DE, FR, IT, ES, RU, PT, CZ, PL, International

Scope of supply: RH2, PMH sensor and silicone adaptor, USB PC interface with cable and software, device case, rubber protection, 4 pcs. 1.5 Volt AA Alkaline batteries

Optional: Bluetooth module for wireless data transfer, portable printer
